1	2	3	4	5	6
7	8	9	10	11	12
13	14	15	16	17	18
19	20	21	22	23	24
25	26	27	28	29	30
31	32	33	34	35	36

Put students in groups of 3. Decide who is going to be the question master. He/She has the answer sheet and confirms whether the players are right or wrong.

Player 1 is noughts and Player 2 is crosses.

Player 1 chooses a number and answers the question from the worksheet. If the answer is right, Player 1 draws a nought in the square. If the answer is wrong, Player 2 can try to answer and steal the square. If Player 2 is wrong, nobody wins the square and you put a line through it.

The aim is to get as many vertical, horizontal and diagonal lines of three as you can.

			o		
x	o	o	o	o	
x	o	x			
x	x				
x					

The score is currently 3 – 3.
 Both players have a diagonal line.
 Noughts have 2 horizontal lines (four in a row = two threes)
 Crosses have 2 vertical lines (four in a row = two threes)

32	33	34	35	Finish
	31	30	29	
25		26	27	28
24		23	22	20
16		17	18	19
	15		14	13
8	9	10	11	12
	7	6	5	4
Start	1	2	3	

Before each turn you must answer the question for the number of your square. If you are right, you can roll the dice. If not, you miss a go.

Remember – you go up from the bottom of the ladders and down from the top of the snakes.
